1. MUSK Introduction

MUSK is combined by MEDIA, UNITE, SELFLESS, KUDOS, this four words' initial capitals. Symbol of traditional media and new media's making different depth values with the past under the blockchain technology and the guidance of the organic combination. In order to achieve this goal, MUSK team will devote themselves wholeheartedly to the classic knight spirit of the best! The MUSK team is ideally positioned to change the original media world and has worked tirelessly to change the world like Elon Musk, the Ironon, the founder of Tesla, the founder of Space X. With "Let the world hear your voice" as the core concept of MUSK, trying to make the blockchain technology closer to every general person, closer to every media person and change the world from the subtle.

Under the guidance of this core concept, MUSK Alliance chain, is a blockchain based global media digital assets trading platform, copyright traceability system and decentralized intelligent advertising distribution system. Digital asset trading platform with media assets registration, distribution, crowdfunding, IP transactions, personal time asset service functions. The digital asset trading platform will use a credible system of trust and circulation automation to store or exchange information and assets through its

transparent and credible blockchain, decentralization, clear traceability, unforgeability and non-falsification. The Copyright Traceability System Aiming to solve the problem that the more and more violent traditional media under the Internet age is from media infringement and chaos, slow circulation of value, difficulty of commercialization and industrialization, and promote the development and upgrade of the comprehensive management of media assets; Promoting the distribution system to utilize the blockchain technology to solve the opaque problems among advertisers, channel operators and operators over a long period of time, eliminating the third-party spreads and making the process of advertisement delivery and the result clearly visible.

Participating in the redemption process of trading in media assets and time assets relying on the perfect wind control model and diversified intelligent contract services through MUSK Token, a blockchain asset issued by the underlying blockchain platform, realizes in the real-world. Complex business logic, thereby changing the business model of the existing media economy and enjoying the lucrative bonuses brought by premium media assets. The use of digital resources is very important to the development of humankind in the 21st century. We need to create a new information and economic-based media development treaty, and we want to create a more equitable and diverse world media space based on blockchain technology.

MUSK's business logic takes the blockchain as the underlying technology, based on media copyright registration, rapid distribution of high-quality media content on the blockchain, through the collection of loyal self-media fans, raising funds on the trading platform for the operation and promotion of the media. The rapid growth of the media has enabled the users or public investors to finally share the proceeds on the trading platform.

MUSK issues digital blockchain assets, MUSK Token, and participating exchangers can trade assets on the platform by exchanging blockchain assets and provide identity and rights management capabilities through flexible deployment of smart contracts. High-quality media and content Realize the circulation and promotion of value through trading and crowdfunding so as to create an interactive digital media transaction platform integrating media assets, digital finance, big media data and interactive communities. Accurate and efficient realization of the value recognition, transition, trading and realization of new media digital assets through the blockchain will use a set of trusted channels that basically rely on trust and circulation to store or exchange information and assets, and define the integrated management of intellectual property Norms and standards, to achieve the real world complex business logic, thus changing the existing intellectual property business model.

2. Business Model

1, MUSK Media Chain: based on blockchain digital asset trading platform

MUSK's media digital asset trading platform consists of a trading platform and a crowdfunding platform. The trading platform is divided into media assets trading, cultural assets trading, IP creation and trading and personal time asset trading.

The blockchain-based digital asset trading platform is the center of media asset holders' rights to deal in digital media assets. The core functions are the registration of new media assets and the processing of new media content assets. Through distributed accounting, central management, Encrypted transmission, intelligent contract transactions, accounting, management, trading methods for the new media asset transactions to provide efficient, safe, convenient and secure.

Cultural assets transactions through the professional identification of cultural products, registration, identification process is completely transparent and the results cannot be tampered with, and the platform for the identification of users MUSK Token award. The platform simplifies the complicated registration in the past transaction of cultural products such as stamps,

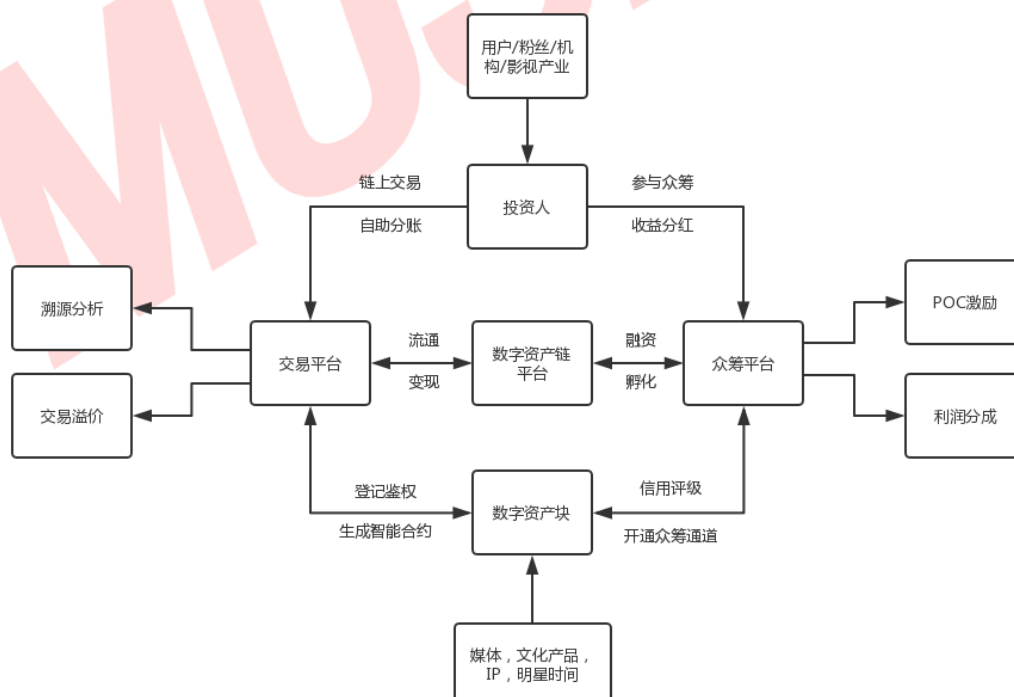

antiques and commemorative coins. After the blockchain technology is used, the owner of the goods is confirmed.

IP creation and trading platform provides crowdfunding channels for quality cultural asset holders. For high-quality cultural asset holders, the platform establishes a new media credit rating system based on blockchain, combining decentralized mechanisms and key index analysis, Screening high-quality new media, according to the credit rating of the asset package, based on user orientation, geographical, system orientation, traffic-oriented, time-oriented, user attribute base label to provide the appropriate level crowdfunding channel. Crowdfunding channel rating and platform community ecology is positively correlated with each other. The long-term evolution of crowdfunding channels is achieved through dynamic tuning of the underlying blockchain algorithms and code configuration. For cultural asset holders, the more content available, the more benefits they receive; the sooner a participant can support valuable content, and the more its content is supported. The more people gain recognition, the higher the income.

Personal time asset-based platform designed to allow individuals, public figures free time assets for time trading and sharing. After one user selects another user or public figure time for the transaction, the smart contract system is operated, and the open and transparent display of the time left in the

transaction and the occurrence of default of both parties are performed.

The new media digital asset trading platform, is based on the blockchain trusted channel protocol developed by the core applications. MUSK Issues encrypted digital blockchain assets: MUSK Token / MCC, which is a distribution medium across the blockchain, mainly addresses the issue of value-added and profit-sharing of digital content assets and reduces the transaction costs. Blockchain features make it easier to share new media resources and increase the value creators' benefits. Motivate content value providers to create content, encourage original and smart contributors to fully advance the new knowledge economy era.

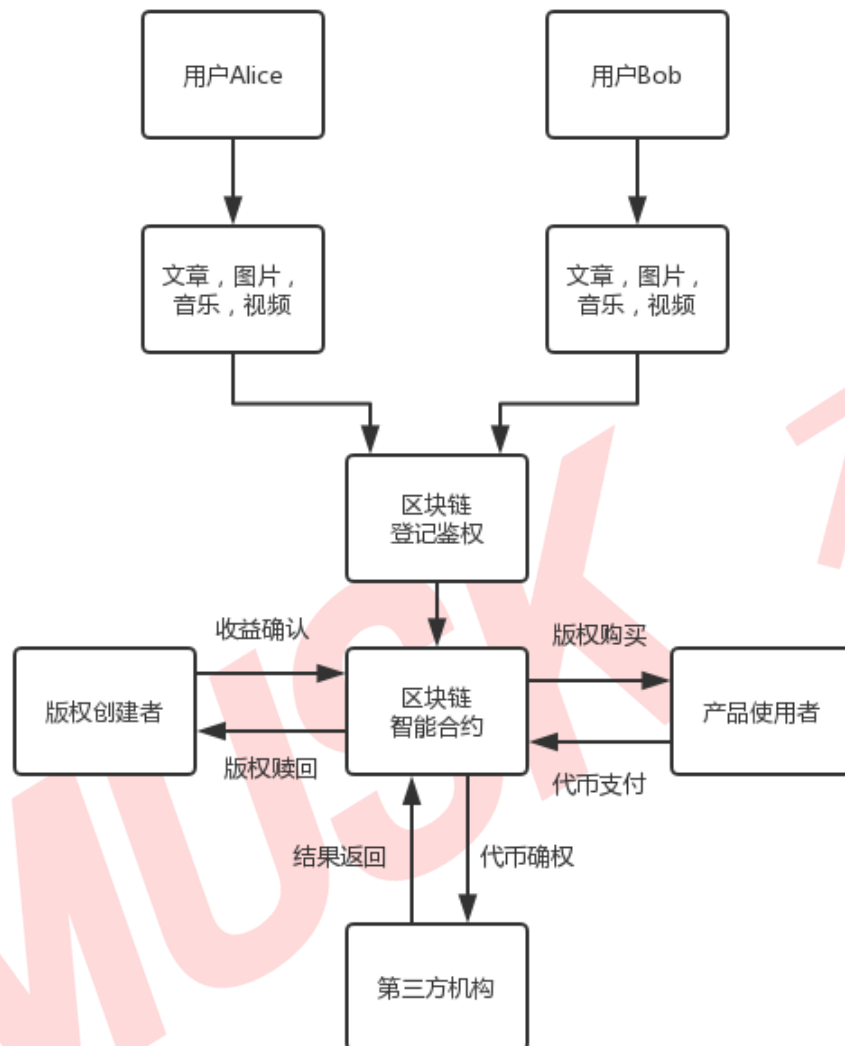

基于 MUSK 区块链的数字资产交易平台模型图

2, MUSK Media Chain: Blockchain-based copyright tracking system

According to the life cycle of digital assets, the blockchain-based copyright traceability system is divided into four processes: registration, transaction, confirm and exercise. The registration right of assets, as a relative front end of the whole model. The information, content information, creation time information and initial transmission information are converted and abstracted by the encryption algorithm to form the abbreviated digital information and recorded in the blockchain, so that all the original content can complete original sound and copyright easily, quickly and at low cost.

Blockchain-based copyright traceability system structure diagram:

3, Decentralized smart advertising promotion distribution system

MUSK established nationwide, decentralized smart advertising promotion distribution system. The system has the national broadcast and multi-province, multi-city and multi-county combination of any playback; with a variety of client-side real-time monitoring capabilities; can provide creative, planning,

design, production, broadcasting, monitoring, evaluation of one-stop service.

Intelligent Advertising Promotion Distribution System Resource Management

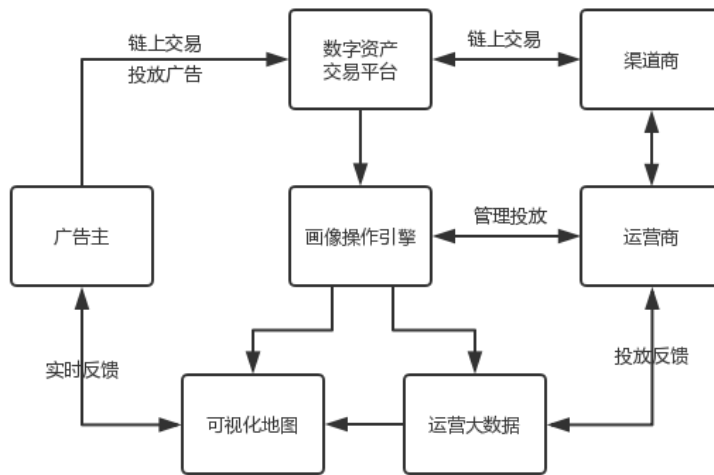

Internet: Using B / S software architecture, cross-platform operation suitable for a variety of network environments, can achieve multi-level content review and authorization mechanism. At the same time with high compatibility, reliability and security. Can achieve unified management, flexible combination of multimedia elements, and through the Internet management of LED media in different locations, and broadcast control requests issued by other LED media. Thus reducing labor costs, time costs to improve work efficiency.

Decentralized smart advertising promotion distribution system has changed the traditional single offline sales mode and introduced the operation mode based on blockchain, making full use of the advantages of blockchain technology to make online browsing, consulting, negotiation and offline purchasing. The implementation of the process is completely transparent.

Advertisers through the underlying blockchain technology not only can control the system according to their own needs, in the country or provinces, cities and counties in any combination of delivery, but also through a variety of based Blockchain technology terminals monitor the effects of their ads anytime, anywhere.

MUSK intelligent advertising promotion distribution system at this stage has been with the range of Zhejiang Wanda, Intime and other business district for initial cooperation, including cooperation LED big screen structures, business district promotion and so on.

Smart advertising promotion distribution platform business model:

4.MUSK media chain other important applications and development

u MUSK Special Fund

To Establish Fund for Media Industry talent development, industrial development research and traditional media upgrade, with 10% of total MUSK offering. The Foundation's goal is to encourage and facilitate the creation of a more equitable and diverse world media space program development of each year, the Media Industry Contribution Achievement Award is promulgated

worldwide, aiming to reward media practitioners and organizations that make a special contribution to the media field.

MUSK expects these premium media content to more easily share media resources through the features of the blockchain, increase the value creators' benefits, motivate content value providers to create content and encourage original and smart contributors. In particular, through mobile terminal access strategy, a series of decentralized media applications such as decentralized media social networking and decentralized media property auction will be launched. Flexible support for all kinds of DAPP, and its matrix product, to achieve different terminal models to provide different applications to facilitate developers to quickly develop their own innovative applications so that ordinary Internet users can truly feel the value of blockchain technology, comprehensively promote the advent of a new media economy.

Taking Playboy magazine, founded in 1953 as an example, sales are shaky under the impact of the Internet technology revolution and the rise of the new media industry. In response to this situation, MUSK will use a special fund to repackage and position Playboy, so that it gets closer with the Internet technology and new media.

▫ **MUSK blockchain asset trading platform**

From the beginning of 2017 to right now, soaring of the mainstream

currency such as bitcoin has led to the development of a blockchain asset trading platform. In the case of Poloniex, a pure digital asset exchange platform, for example, monthly traffic in P (Poloniex) net daily trading volume jumped from 7 million to 5 billion yuan. Even with the transaction fee of 0.2%, average daily income can reach 10 million yuan.

Countries' attitudes toward blockchain assets, from prohibition, approval, support to legislation, all indicate that the blockchain assets are the future trend of development. The technologies such as the blockchain of digital assets are precisely what the financial industry needs now.

There are currently two main types of blockchain asset trading platforms: a type of trading platform that deals with legal tender, transactional exchange services that provide blockchain assets and the legal tender, and the other is the MUSK's focus - A platform for transactions between chain assets.

Blockchain, as Internet technology, for the first time was included in the "13th National Informatization Plan ", marking the heat of the blockchain technology reach a new height and blockchain asset value highlights. We aim to provide the public with a new investment option to boost the development of blockchain technology and promote the social progress and commercial development of blockchain application services.

MUSK blockchain asset trading platform is to "let the world hear your voice." Blockchain assets, as part of MUSK's world, besides is sounding for the general public as well as providing a safe, fair and open trading platform for digital tech enthusiasts.

MUSK blockchain asset trading platform is now cooperated with the Hong Kong Gao Fung Group, Indonesian Chinese and Venezuela's government. After the establishment of the trading platform, it will cover the blockchain industry in Asia, the Asia-Pacific blockchain industry circle and the South American blockchain industry. This three-point linkage will gradually move closer to the world.

MUSK, unique media alliance to expand and support

The concept of Bit Finance was first proposed in 2017 and was implemented by MUSK's strategic cooperation agency -- the Mass Media Group. As the first blockchain project on the chain of MUSK, the concept of Bit Finance was invested by some well-known investors such as Xue Manzi and Feng Tao.

According to the design and release of open source software and building on its blockchain (technology, trust, value), digital currency encryption and the Internet, new media, IP composition, MUSK takes blockchain as a starting point for all media financial platform, including : WeChat public account, Sina

Weibo, Toutiao, Netease, Penguin, Bigfish, Little info, Sohu, Phoenix, Tianya Forum, Zhihu, Douban, 19th floor and so on.

The eco-media matrix promoted by the Bit Finance is based on the team of "Veteran new media", the bottom of the autonomous blockchain for the new media industry, and the new blockchain based on the IP asset exchange and distributed economic ecology. Bit Finance takes the blockchain as the starting point of the all-media financial platform. Committed to the quality of content output, from abroad to domestic, to do refined, deepening, cohesive integration of packaging and delivery. Not limited to a media platform, the Bit Finance matrix, with the whole network of resources, creates while operates more than 10+ since the media platform.

∪ Top Content Production Team

Massive production of high-quality original content is currently a lot of self-media's shortboard, but this shortboard does not exist in the MUSK self-media matrix. The team can operate within the country from the media norms, strictly avoid the risk of being blocked from the media. The nation's first self-media coverage covering the third and fourth tier regions extends news coverage to every corner of China and creates a "hot spot" matrix of China's most efficient linkage. Bursts of hot spots within 4 hours can be sent nationwide through the media matrix

∪ Resource Advantages:

1, operations: Bit Finance has operated more than 1,000 public accounts (operational capacity);

- 2, writers: 1000 + professional journalists, 500 + content creators;
- 3, channels: 2000 + self media release platform, the major portals' columns, the forums, the community;
- 4, authoritative platform for new media "Heima", "New list", "28 push" and other platforms in depth cooperation.

5. Technical framework

MUSK's technical architecture follows the blockchain design specifications and standards and subsequently extends its technical boundaries according to its own characteristics. Through the module pluggable and flexible configuration of smart contracts to ensure the network's ease of use and operability. Support multi-protocol features, compatible with BIP protocol and POS smart contract platform, and the consensus mechanism as a modular, compatible support between different protocols, including consensus mechanisms, rights management, accounting management, data structures. And oriented by the industry, through DAPP's policy access on the mobile terminal, different application scenarios can be applied and the technical advantages of the blockchain are brought to the users facing the media assets and the ordinary Internet users.

Technical structure diagram is as follows:

3. The economic model

MUSK issues digital blockchain assets: MUSK Token.

MUSK Token is the medium of circulation on the entire MUSK, representing the use rights and ownership of the MUSK blockchain. Owning the MUSK Token represents ownership of the MUSK; MUSK Tokens are required for applications using MUSK.

MUSK Token total 1 billion copies, followed by a certain rule and proportion assigned to different holders.

1, Distribution

As mentioned above, MUSK issued MUSK Token, the total issue of 1 billion. Distribution plan:

1, 30% of MUSK Token (300 million) will be allocated to participants during the redemption phase and will be converted into approximately 30,000 ETHs. For

details of the scheme, see the allocation rules below.

2,25% of MUSK Token (250 million) is allocated to the MUSK founding team;

3,15% of MUSK Token (150 million) as a global business promotion

cooperation;

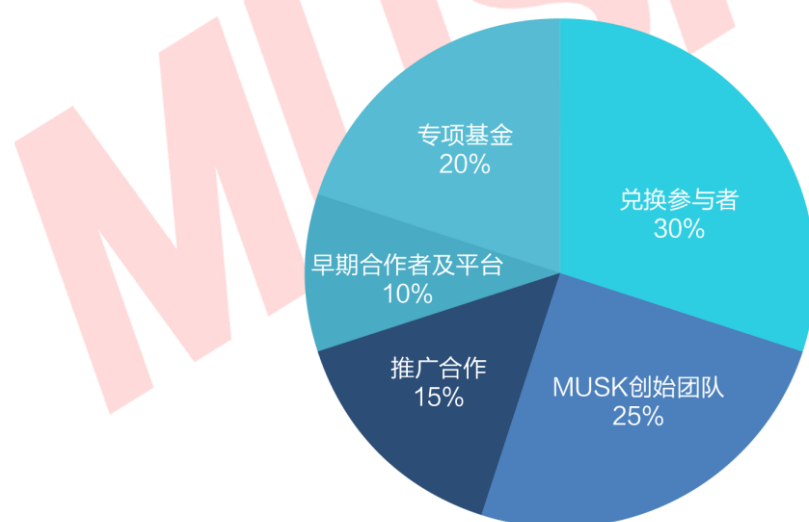

4, 10% of MUSK Token (100 million) major rewards for early adopters and

collaboration platforms that recognize the MUSK media application matrix;

5,20% of MUSK Token (200 million) allocated to Philanthropic Foundations to

help promote the re-upgrade of knowledge and traditional media as well as

media talent development and media industry conferences.

MUSK Token 的分配方案

2. Early bird plan exchange rules

This redemption is the "Early Bird Plan," totaling 300 million MUSKs, representing 30% of the total circulation and converting approximately 30,000

ETHs, including BTC, QTUM, ETH, EOS and INK.

The Early Bird Program will be divided into four phases - Early Bird Exchange Program A, B, C, D. 30% MUSK assigned to early bird exchange stage.

Formal exchange stage for foreign blockchain technology lovers, Chinese citizens are forbidden to participate. Exchange about 30000ETH. Early Bird plans to redeem blockchain at each stage up to 500 bitcoins, after which MUSK will close the current exchange and move on to the next conversion stage. For the excess part, MUSK will follow the established conversion ratio of the original return to participate in the exchange of users.

The overall situation and the exchange ratio as shown below:

早鸟计划	早鸟计划阶段划分			
	早鸟 A 阶段 (已停止兑换)	早鸟 B 阶段 (已停止兑换)	早鸟 C 阶段 (已停止兑换)	众售阶段
	4000ETH	6000ETH	10000ETH	10000ETH
发行量	3 亿			
兑换规模	约等值 30000ETH			

v After the exchange reaches 30000ETH, we will close the exchange channel as soon as possible, but there is still excess possibility. For

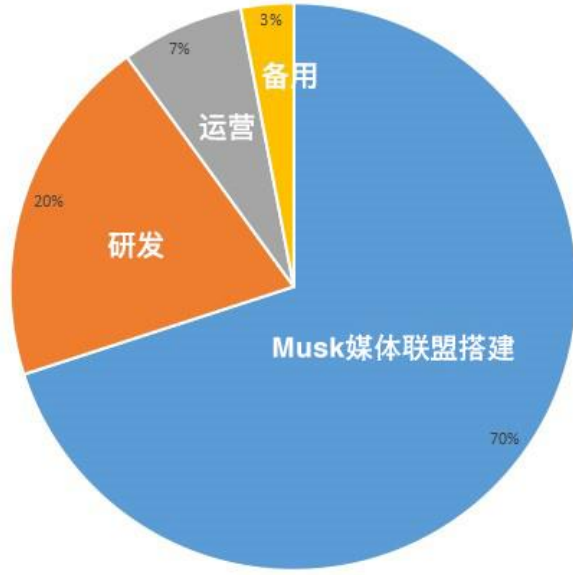

the excess part, we will return within 3 working days after the exchange.

v After the exchange, the blockchain assets held by the team will implement a two-year gradual release plan, releasing 50% in the first year and gradually releasing the remaining 50% in the second quarter in four quarters. This is to ensure that the team can continue to implement the development plan after the exchange is over.

3 . Redemption instructions

v Exchange blockchain assets, mainly for the following three aspects

- 1, support MUSK stable operation, complete MUSK development, operation, promotion and long-term development.
- 2, high-quality media content mining and new media alliance to build.
- 3, MUSK special fund set up to help promote the protection of intellectual and intangible cultural heritage, media personnel training, upgrading of traditional media and the development of new and old media industry.

■ Musk媒体联盟搭建 ■ 研发 ■ 运营 ■ 备用

MUSK

4.The Development Plan

MUSK plans to start the exchange on December 25, 2017 and the blockchain community platform will be launched in March 2018. The MUSK blockchain-based digital asset trading platform will be completed in August 2018, Blockchain copyright traceability system, December 2018, go to the centralization of intelligent advertising promotion distribution system test version on the line.

MUSK ↑

5. The Risk Warning

↳ Security:

Many digital asset exchanges stop operating due to security concerns.

We value safety very much, but there is absolutely no 100% safety in the world, for example: losses due to force majeure. We promise to do everything possible to ensure the security of your transaction.

↳ Competition:

We know that the exchange is an area of extreme competition. Thousands of teams are planning and embarking on the development of the trading platform. The competition will be cruel. But in this era, any good concept, startup, or even a mature company will be faced with this competition risk. But for us, these competitions are the driving forces in the development process.

↳ summary

To sum up, nowadays with blockchain assets highly sought after, we have created a long-term sustainable development focused on blockchain assets to provide investors with a safer, more efficient and trustworthy trading platform.

The best investors have teams and experience as their core criteria, and MUSK is the choice of countless great investors; you'll be better off with the best people.

6.MUSK Foundation Profile

The MUSK Foundation is sponsored by MUSK FOUNDATION LTD. In Singapore and operated by MUSK Corporation in Japan. The MUSK Foundation aims to achieve global distribution and popularization of MUSK affiliate chains for blockchain applications.

Singapore MUSK FOUNDATION LTD. Is responsible for the MUSK affiliate chain’s legal, personnel, financial matters.

MUSK Japan Co., Ltd. is mainly responsible for the promotion of MUSK alliance chain, community establishment and technical maintenance support.

Sino-area partner Zhejiang Mass Media is mainly responsible for the commercial operation of "Bit Finance", an incubation project of MUSK alliance chain.

MUSK Foundation consultants and investors

Partners in China -- Zhejiang Mass Media Team Introduction

Team	<p>Ye Fei (Chinese Community Chief)</p>	<p>15 consecutive years of entrepreneurial experience, angel investor, rich experience in international business operations, successful self-media business experience. Engaged in Weibo VIP operation, and alliance covering business management and work-life balance microblog and giving services to Gree and other 40 listed companies.</p>
	<p>Fang Pingbo</p>	<p>Business leader, 11 years of business planning and management experience, rich experience in project</p>

		<p>management. Project planning and management since 2007, big data planning and management since 2015.</p> <p>Projects include: big data intelligence project of customs, big data audit project, dynamic analysis of business big data, big data project of cross-border e-commerce, Zhejiang Energy Group's big data projects and other relevant listed companies' industrial big data projects.</p>
	Wei Xin	<p>Chief Human Resources Officer, 12 years' experience in human resources industry, 10 years of industry management experience. Establishment of a management system of each module of Kangxi Holding Company in line with the requirements to be listed on the National Equities Exchange and Quotations;</p> <p>Trainer of Zhejiang Medical Insurance Center, Zhejiang Province Pension Management Center, Zhejiang Tianjian Certified Public Accountants.</p>
	Wu Fei (Finance Chief)	<p>Senior Finance Manager, 12 years of financial related experience, 6 years of industry management experience. Former Junlan Hotel Group chief financial</p>

		officer, rich office investment and financing management experience.
	Wang Hao (Technology Chief)	Years of product development experience, has been engaged in server operation and maintenance, website development, big data processing.
	Xu Jiajia (Promotion Chief)	Years of financial investment experience, senior financial marketing planner, product investment adviser.
consultant	Huang Butian	Founder of Yunxiang blockchain, baas cloud platform, electronic contract deposit of Industrial Bank, POC of private equity and financial assets transaction, pioneer of blockchain technology research in China, Zhejiang Blockchain Application Association vice president, China Computer Society Blockchain Special Committee (chip) one of the promoters; editor of <i>Blockchain Decryption: Build Credit-based Next Generation Internet</i> book.
	Xue Manzi	One of the founders of UT Starcom, once served as chairman of Chinese e-commerce network 8848, chairman of China Learning Network and other positions. His investment projects include PCPOP, Lixiang carhome, Snowball Financial Sidelines and other companies. 2008 (2nd) China Venture Capital Value List, Xue Manzi won the "Best Angel Award."
	Li Wei	Senior brand marketing and planning, senior product operation consultant, senior media people, mainly responsible for the following brands: Jiaduobao, Vick vr, Guomei, and the partner of Pteris Butterfly Culture Media.

Zhu Linyao	Extensive experience in strategy formulation and decision-making in corporate operations, investment and market development, Chairman and President of Warburg International Group, No. 134 in the Forbes Chinese Rich List 2015.
Cao Shen	The well-known CEO coaching staff in China successfully coached more than 70 domestic listed companies and founders of China Wolf Training Camp and helped 33 A / B rounds and IPO Internet companies reach key goals, including Pre IPO's 58 Tongcheng, Qihoo 360 Mergers and acquisitions after the merger. A round after round of Invensys' rapid appreciation of valuation, as well as Qin Network, Jagged Network, Unlimited Touch, Hengtai Mall, Ming Road and so on.
Chen Caigen	Founding partner for Friends Capital, well-known new media KOL, community experts, Alibaba and Haier University Distinguished Instructor, Analysys International Champion Think Tank.

	Xu Chong	CLPA 2016-2017-year venture capitalist of 1980s, ten years of investment experience, worked in the Barbarians Fund, Bohai Securities, Huaxia Happy, Wuzhong Ventures and other agencies involved in the investment decisions and investment management of nearly 120 venture capital projects, investment projects include: credit housekeeper, Mu Jinnong, Excellent letter insured, 4931, Panda visa, auto repair Po, catfish electricity supplier.
	Mai Tao	Founder of Tyrannosaurus Rex, Google Game, one of angel investors and co-founders, one of the earliest known VC project investors in Guangzhou and South China, has more than 15 years of entrepreneurial and investment experience in communication / IT / internet, and successfully established Huashi Technology and invested in the valley network project, setting a record of hundreds the value of investment in the industry.
	Jin Peng	Fudan University, PhD, Formerly Shengda Network senior vice president, one of 2005 China Top Ten Marketing Persons, successfully founded a number of Internet companies, has in-depth understanding the development of China's Internet industry and trends, and has extensive network resources. In the relevant state departments and local government has a wealth of

		contacts and social resources.
	Shuaichu	Qtum Co-Founder, Finalist Forbes Under 30 in 2017, Qtum Project becomes the Largest and Most Valuable Blockchain Open Source Project in China (Valuation Is Nearly \$ 1 Billion)
	Chen Mingjie	Founder and chief executive officer of Travel Group, Asia's Top 100 Potential Enterprise, named by Red Herring, and the hottest community-based start-up website in the non-US native sector jointly selected by Business 2.0 and CNN
	Feng Tao	Founder and core creator of Lianchuang Venture Capital, leader of venture capital and risk community in China, nearly 20 years of investment experience and dozens of successful cases, with a unique vision in the field of venture capital. Previously selected as Fortune Global 25 new enterprise star; main IPO / mergers and acquisitions projects: Link Central Pharmaceutical, Siyuan Electric, Dongjiang Environmental Protection, Beijing Health Control, Western Mining, Yuanwang Valley, Goldwind Technology, FuJiRongTong, China Netcom, Kangyuan pharmaceuticals. December 15, 2009, named by Forbes Chinese Magazine "2009 Forbes China's best venture capital investors," ranked fourth.
	INB Coin Capital	Coin Capital was founded by Li Xiaolai and Yi Lihua; Li Xiaolai: Famous Angel Investor of "China's Bitcoins Ritchie Bourgeoisie", author of many bestselling books such as "Time as a Friend", "Freshman - Seven Years as a Whole Life", "Breakthrough in 21 Days of TOEFL Core Vocabulary" The founder of qingfeideyi Beijing

		<p>(Beijing) Technology Co., Ltd., founder and member of the Bitcoin Foundation, famous in the angel investment community and habitual transborder.</p> <p>Yi Lihua: a well-known blockchain investor, the founding partner of UCL Capital, the partner of Zhongwo Investment, the founder of FoKing, chairman of Tianhe Guoyun and the founding partner of INBlockchain (Coin Capital). He has invested in more than 30 blockchain projects including BeX, Gongxinbao, Bobby, Chain, ETH, BTM, Zcash, EOS, Beechat, Mixin, aelf, Qutm, weilian, leiying, BigONE and over 30 Blockchain projects, covering exchanges and other fields, the investment project has created more than 100 times the rate of return.</p>
--	--	---

7. Conclusion

Seven years flies.

We have been working in the new media industry for seven years.

In the past seven years, we are constantly searching for our own way and looking down at the brilliant dawn of the new media industry.

We walked out our own way to find the Venus hanging in the night sky.

We want to refer to every new media person the star of MUSK.

Soon after, we will eventually hold the stars and hand the MUSK to illuminate the road to the dawn for every new media person in the darkest hours.

I am grateful to those who supported us all the way, to those who came along with us all the way, to the people who follow us on the way to the future, and to the ability of you to hold the stars.

Today, with the most sincere thanks, thank you for making MUSK really shining.
