

gCn white paper

We will update this paper as plans change.

Version v1.03

21/06/2018

Hi

After a lot of requests we have decided to make a list of future plans for gCn coin.

gCn is a scrypt coin. It is a clone of Litecoin / Dogecoin. This allows for faster transaction times and tiny fees. This makes gCn suitable for very small transactions as well as large transactions. We are also relying on a tried and tested code. Our blockchain is over four years old.

gCn was established in March 2014.

The developers are based in Dublin, Ireland.

We are not trying to raise funds. We are not nor have ever had an ICO (Initial Coin offering).

1) As long term users of gCn (previously GCoin) are aware the developers have a track record of disclosing factual information and keeping to plan. We have developed a selection of different games over the years and the other necessary infrastructure to run gCn cryptocurrency. This also includes the file transfer website www.gfile.us

2) gCn has over 157 billion coins in circulation. There is a maximum of 200 billion gCn possible as the block reward halves every 533,333 blocks (currently gCn 75,000 due to half in June 2018). The advantage to having such a large number is that we will stay the positive side of the decimal point even with a vast amount of users.

3) gCn peaked with a market cap of \$36m in January 2018. We hope to return there this year. This will depend on outside factors like the price of Bitcoin and the general view on cryptocurrencies by the general public. Given the tax advantages of cryptocurrencies we feel people will continue to build up stock of these currencies.

4) gCn has invested a lot of time and work into GCar car transport app with the intention of integrating gCn coin into the system once we gain traction. Due to the urgent requirement to have gCn exchange

working we have had to push this app down the importance list for a while.

5) As gCn coin now has its own exchange we will always have open trade under any circumstance. It will take time to develop this exchange. gCn can now grow without interruption. Many of the most successful crypto coins have their own exchange. gCn is happy to join this group.

6) As the developers in gCn also own www.webworld.ie we have serious hosting facilities and database experience. We expect this will help reduce the issues other exchanges had in terms of handling traffic.

7) As our games users will know we have to re-calibrate the games to deal with the new volumes of traffic. This work has now begun. We recommend storing your gCn in a Windows or Apple wallet when updating. If this is not possible move your gCn to a different Android wallet. Game scores will reset on update. The games moving forward will only distribute small amounts of gCn like a faucet.

8) Originally gCn had written apps for Apple products. They would not let us list in their app store after we spent the time developing them. We didn't focus on Apple after that. We stuck with Windows and Android. We have now completed and launched our Apple computer wallet.

9) We have many ideas for gCn coin in the future. We don't believe in speculating. We prefer to inform. We publish plans when they are in development or when they are ready to go. There are no shortages of promises in the crypto world. We will leave that to someone else.

10) gCn is very well funded as we re-invest all income we receive. We take a very long term view on cryptocurrency. We recommend all gCn users do the same. Expecting overnight killings is not a positive way to enjoying cryptocurrency. Our long term users waited almost four years for their first real earnings. Where will we be in four more years? gCn could be a great retirement plan costing very little ;)

11) gCn has now opened a retail store in Dublin where users can exchange their cryptocurrency for cash or bank transfer.

12) gCn continue to advertise and promote heavily. There are limits due to the advertising ban by the large social media companies. We have found ways around some of those bans.

13) One more message. Please store your gCn in a Windows wallet with many backups of your wallet.dat file.

Be safe. Print out and hide your private key too.

Best

gCn since early 2014

Fast transactions

Very small fees

The three bar button on the top left is for the menu.

gCn is suitable for very small transactions as well as large transactions. We rely on a tried and tested code (a clone of Litecoin). Our blockchain is over four years old. With a large amount of coin, users will avoid having to use fractions of a coin for transactions in the future.

Our office is open from 9:00 to 22:00 GMT (Dublin time).

*gCn has a maximum supply of 200 billion
Issued to date, over 155 billion gCn
The mining block will half to 37,500
reward around July 2018.*

*gCn is located in Dublin, Ireland.
