1. Introduction

What Is [GlassCoin](#)

Glasscoin is an open source, peer-to-peer, community driven decentralized cryptocurrency that allow people to store and invest their wealth in a non-government controlled currency, and even earn a substantial interest on investment. This means anyone holding Glasscoin Coin in their wallet will receive interest on their balance in return for helping maintain security of the network.

Transfer instant Peer to Peer

Peer-to-peer itself means Glasscoin runs without having a central server. The storage server is decentralized and distributed-divided into various servers run by each user connected to the network.

Glasscoin transactions are Anonymous

All the transactions we have done can be seen, but we do not know who the owner of the Glasscoin address is if the owner does not tell it. Each Glasscoin user can actually choose whether or not his name will appear, but even if the user wants to keep his identity secret, all of his transactions are still recorded and can be monitored through blockchain.

Transfer Money Easily

Just like Bitcoin, it can be sent anywhere in seconds, whenever and wherever you want. Money transfer with Glasscoin can happen only with a smartphone's and internet connection.

Transfer fee is very small

Transfer fee can be removed until free, but to speed up transactions, you can set the cost in Glasscoin wallet as needed no matter how much coin is sent.

Transactions are very easy

You can transfer Glasscoin to anywhere in the world as long as it is connected to the internet. Glasscoin will be deposited into the Glasscoin Wallet.

1. Register via [Web wallet](#) or Download Wallet app,
2. Enter Glasscoin Address from the transaction opponent and the amount of Glasscoin you want to transfer
3. click send button.

A screenshot of the Glasscoin Wallet website. The page has a dark grey header with the Glasscoin logo on the left and navigation links 'HOME', 'SUPPORT', 'STATUS', 'LOGIN', and 'CREATE ACCOUNT' on the right. The main content area is white and features the title 'Glasscoin Wallet' at the top. Below the title is a sub-header: 'A Powered by Glasscoin Web Wallet. Store and manage your GLS from anywhere in this smart and beautiful apps'. The page is divided into two columns. The left column is titled 'Fast & Secure' and contains the text: 'This online wallet is powered upon NodeJS/MongoDB running in conjunction with a Glasscoin Full Node, allowing access to the speeds and power of the Glasscoin blockchain.' Below this text is a dark grey button with the text 'SIGN UP!' and a right-pointing arrow. The right column is titled 'What is Glasscoin?' and contains the text: 'Glasscoin is a cryptocurrency built upon the original Bitcoin Core Satoshi Nakamoto codebase. It features a new Proof-Of-Work hashing algorithm called "Tribus" and also features Proof-Of-Stake at 10 % per year.' Below this text is a dark grey button with the text 'VIEW GITHUB' and a right-pointing arrow.

The number of coins is limited

Glasscoin supply will only have 29 million coins worldwide, this resembles an economic system based on deflation and with increasing supply coin, Glasscoin prices tend to rise, when demand is high and the number of coins that remain is not increased.

Glasscoin is not controlled by institutions or governments

Glasscoin that uses the Blockchain database is not controlled by a party, but is so open to the public that it is impossible for someone to forge transactions in Blockchain. All transactions are recorded live, transparent, and spread across multiple servers.

Those who want to change or falsify Glasscoin transaction data must hack multiple servers at the same time.

Differences Bitcoin and Glasscoin

In the world of cryptocurrencies, Bitcoin and Glasscoin are not much different, the difference is Opportunity and Price. To have one Bitcoin you have to prepare more usd2000, Glasscoin has a bigger opportunity is because the price is still very cheap and you have chance for the price of pre sale distribution coin.

which is not You get the in bitcoin before.

How to Get Glasscoin

You can get Glasscoin by buying and staking. To buy Glasscoin can be done through exchangers who have worked with us.

4 How are they produced?

1. Invest/Lending program

2. Trade

3. Mine

4. Staking

4.1 Glasscoin Lending

You can invest Glasscoin coin in Glasscoin lending platform exclusively from the Glasscoin Dashboard. This investment option involves profiting from Glasscoin trading bot and volatility software. You will receive daily profit based on your investment option. Upon investment term completion, you will receive your CAPITAL BACK to take out from the Glasscoin lending platform or optionally reinvest back in lending platform to continue receiving daily profit.

4.2 Glasscoin Trading

You can also profit from downward movements in Glasscoin coin price by selling them at a higher price and buy them again at a lower price and pocketing the price difference

4.3 Glasscoin Mining

Glasscoin (GLS) mining is the process by which new Glasscoin Coin are generated. Glasscoin can be mined with CPU/GPU and does not need an ASIC miner like Bitcoin does.

4.3 Glasscoin Staking

The moment you acquire Glasscoin Coin it becomes an interest bearing asset with Up to 10% return per year through PoS minting. All you have to do to earn with this method is to hold coins in your Glasscoin wallet. This means anyone holding Glasscoin in their wallet will receive interest on their balance in return for helping maintain security of the network.

This means anyone holding Glasscoin in their wallet will receive interest on their staking balance in return for helping maintain security of the network.

*You can **terminate coin staking** anytime and send all your coin with interest to exchange platform or web wallet.*

Remember: You require to hold your Glasscoin Coin **minimum for 5 days** to start earning Staking interest. You will see PoS minting Block in your wallet anytime after 5 days, the number of block you earn are based upon the number of coins you hold in wallet software
