

# Compound Coin White Paper

## Details

Coin Name: Compound Coin

Short Name: COMP

Algo: X11 POS/POW

2 Minute Block

Port/RPC Port: 8422/8442

Min/Max Stake Age: 1/30 Days

POW has ended.

## POS

Block 1000-50000 = 250% APR

Block 50000-100000 = 500% APR

Block 100000-500000 = 250% APR

Then percentage halving every 500000 blocks until block 2500000 = 7.8% APR

Block time is 2 minutes, so 1000 block is about 1.389 days.

## History of Compound Coin

Announced 30<sup>th</sup> September 2017. Compound Coin was born out of the death of UKC coin. The original developers of Compound coin offered fair 1-1 swap of UKC coin to COMP coin. This enabled those with coins of now no value to swap them for a new and working coin.

The initial COMP pre-mine was used for a swap from UKC to COMP and for development. Unused coins were burned.

Like most crypto coins Compound Coin is an experimental coin that rewards holders staking the coin and making their assets grow bigger. Compound Coin also emphasizes the importance of compounding the coin to make an asset grow exponentially.

The project is very much community based with like-minded people working to support it across the globe.
