2. LEGAL DISCLAIMER

The purpose of this document is to introduce ETHEREUM MONERO (EXMR), is an ERC-20 division of Monero, with technology and superior to the MONERO business model. EXMR offers potential owners acquire their tokens in relation to what it means to obtain an ERC-20. The information contained below may not be exhaustive and does not involve any element of a contractual relationship. Its sole purpose is to provide relevant and reasonable information to holders of potential tokens so that they can perform an exhaustive analysis of the company with the intention of acquiring their EXMR Tokens. ETHEREUM MONERO (EXMR) will be at PRE-ICO in February and to the ICO in March, with their tokens based on Ethereum (ERC-20). This document does not constitute an offer to sell or a solicitation of an offer to buy or a guarantee in any jurisdiction in which it is unlawful to make such offer or solicitation. The FINMA Switzerland nor the values of the United States and SEC. Or any other foreign regulatory authority has approved an investment in the tokens. An EXMR token can be categorized as a guarantee of privacy as a right to holders of tokens, to receive the benefits of its operations from development and unique features. Statements, estimates and financial information contained in this document constitute statements or information. Such statements or information relate to known and unknown risks and uncertainties that could cause results or actual events to differ materially from estimates or results expressed in such implied or forward-looking statements. This document is the official document in English language, that is the official source of information about EXMR token. The information contained herein can be used in the course of written or verbal communication with existing and potential community members, partners and so on. In the course of the information, content may change during the development of EXMR. The precision of the English White Paper, the provisions of the original English language document shall prevail.

3. OVERVIEW

EXMR is a token of ERC-20, we call it the new Monero. EXMR is based on the interface of the blockchain from Ethereum, intended to serve the same purpose of the previous Monero, but a fast and secure way. Users can now have a new experience with EXMR as Monero, but the best replacement for the original, when more people trying to discover our EXMR has a cheaper transaction in transaction cost and with more privacy in the ecosystem of Ethereum, this becomes a fascinating experience, making the user prefer to use instead of Monero EXMR. Our growing community is changing to Ethereum technology, because this is one of the best platforms that maintain a constant technological advancement, offering every day more privacy, speed, and safety in their transactions, the advantage of getting a Crypto EXMR currency by having your complete control of your transactions, this makes immediately EXMR digital insufficiently active. This intelligent Ethereum, accompanied by ETHEREUM MONERO (EXMR) contract, which aims to encourage online purchases through the main crypto coins, sees a great future for EXMR making it one of the most extraordinary cryptos by its utility. EXMR Get Crypto Payments project will offer the possibility that people can buy goods and services in online stores, as well as physically. The entire community involved in the world of the crypto coins were in need of a digital asset as since EXMR which can now purchase items online if cost, pay for goods and services, etc. ETHEREUM MONERO (EXMR) is important to note that it is not controlled by a central organization. There is not a single agent with power modify rules of the shareholders or the economy of the currency, but something that operates under a consensus in every movement. This document presents the philosophical basis, the technical bases and economic mechanisms of EXMR.

3.1 INTRODUCTION

EXMR is a token ERC-20, working under the Ethereum ecosystem, we all know that it is the fastest in the world, in terms of time and fast generation of blocks, we can then have an EXMR working faster and safer in terms of speed and privacy, an alternative so people can change towards a real promising technology, with a value that going in a constant increase over time, for the support and the avant-garde represented by the Ethereum ecosystem in addition to their payment gateway “GetCryptoPayments.net by ETHEREUM MONERO (EXMR)” project.

3.2 MISSION

Our mission is to create a revolution in the market around EXMR to become one of the cryptos most valued currency, we aim to be within the 100 main crypto coins, according to market capitalization. Our payment gateway system will make EXMR can obtain a broad marketing, if we add the fact that EXMR has a limited edition of 15 million units, and that it has support from a large community that provides a constant support to each now, in addition to its online payment gateway project, where stores online merchants may receive payments in their sites web as well as physically, in other major currencies crypto, both EXMR this economic environment will make EXMR MONERO Family more strong every day.

3.3 VISION

We are helping to expand the boundaries of investment possibilities and to encourage sceptics to recognize tools offering the technology blockchain since this is a new reality for the classic financial markets. In short, ETHEREUM MONERO (EXMR) aims to be a point of reference for the investment capital and a new instrument to be included in current, online payment system with the goal of being an emerging opportunity for a distributed economy. We are confident that the ecosystem that is being created around ETHEREUM MONERO (EXMR) is promising since the objective is that each person to navigate through a virtual store can see the option to acquire their good or service through EXMR, this is our long-term goal.

3.4 THE PROBLEM

In the market for the crypto coins, the main problems are security and cost. Many people have access to the crypto coins, but only to sell them and buy them in the Exchange, being this one of the reasons of the because many crypto coins cannot advance because of this reality, many crypto's to coins have subtracted your credibility in large part of the world. ETHEREUM MONERO (EXMR) aims to change this reality with our proposal.

3.5 THE SOLUTION

Any business or individual wants speed, convenience, transparency, low operating costs, security and control over your transactions all these advantages and solutions. Our alternative is to encourage also with your online payment gateway a better confidence towards the tokens and all the crypto coins at the same time. Another solution is that now a number of stores and online merchants may receive payments in EXMR with zero costs of tariff and other crypto coins this one does with rates...

4. TECHNICAL INFORMATION

- **Why we select Ethereum Blockchain**

The blockchain of the Ethereum has a high technological level, it works very similar to Bitcoin, but above all the most important thing the blockchain consists of a series of blocks and each block contains a pointer to the previous block and an ordered list of operations. Blocks are secured by the proof of work, with "long chain" (as defined by the total difficulty) by defining the set of committed transactions and order that must be processed. To get to the "current state" of the Ethereum blockchain, a node can start from the State of "genesis" (a common initial state that is included with each client from Ethereum) and process each transaction, any balance/sequence resulting from the application number code storage changes sequentially processing and code of execution of the transaction. The same process occurs in Bitcoin; Although Ethereum's emphasis on "transition state" of the execution of the transaction model is unique (for example, in Bitcoin, a transaction often philosophical is seen as an expense "outputs" from a previous operation in history, not in objects in the State), the way it works the code Ethereum, Bitcoin and other protocols such as ripple, Dogecoin, etc., is essentially the same.

4.1 EXMR TOKEN

EXMR is only created during a single event and this was started last October of 2017. EXMR believe up to 15 million this means that the maximum number of its total supply of EXMR will be 15 million.

Name: EXMR

Symbol: EXMR

Decimal: 8

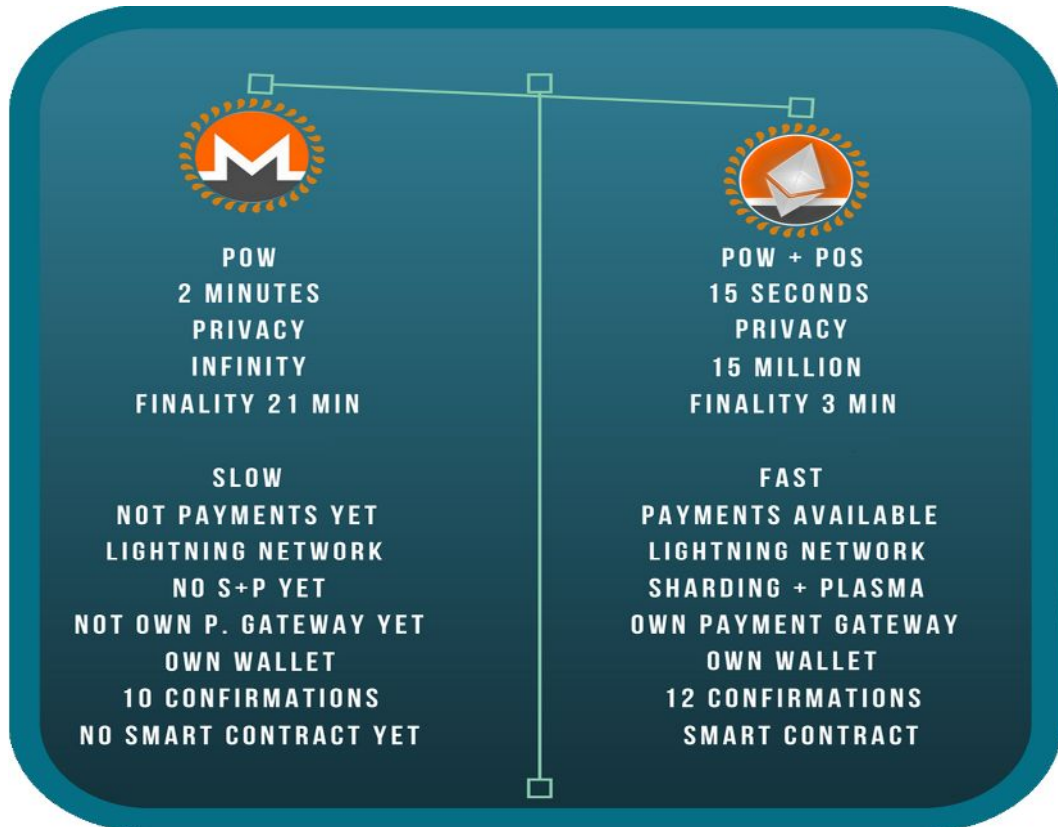

Contract: 0xc98e0639c6d2ec037a615341c369666b110e80e5

Total: 15 million

5. XMR vs EXMR

Great advantages that can be found within our new ETHEREUM MONERO (EXMR) is a time of block 15 seconds, which makes it superior to the traditional Monero, where his block time is up to 2 minutes, a difference of more than one minute and a half minutes i.e. a faster EXMR. In terms of the total supply of EXMR will exist only 15 million, while the previous version of Monero has an infinite supply. In the comparative table below, you can now appreciate the great advantages of our advanced ETHEREUM MONERO (EXMR) represents.

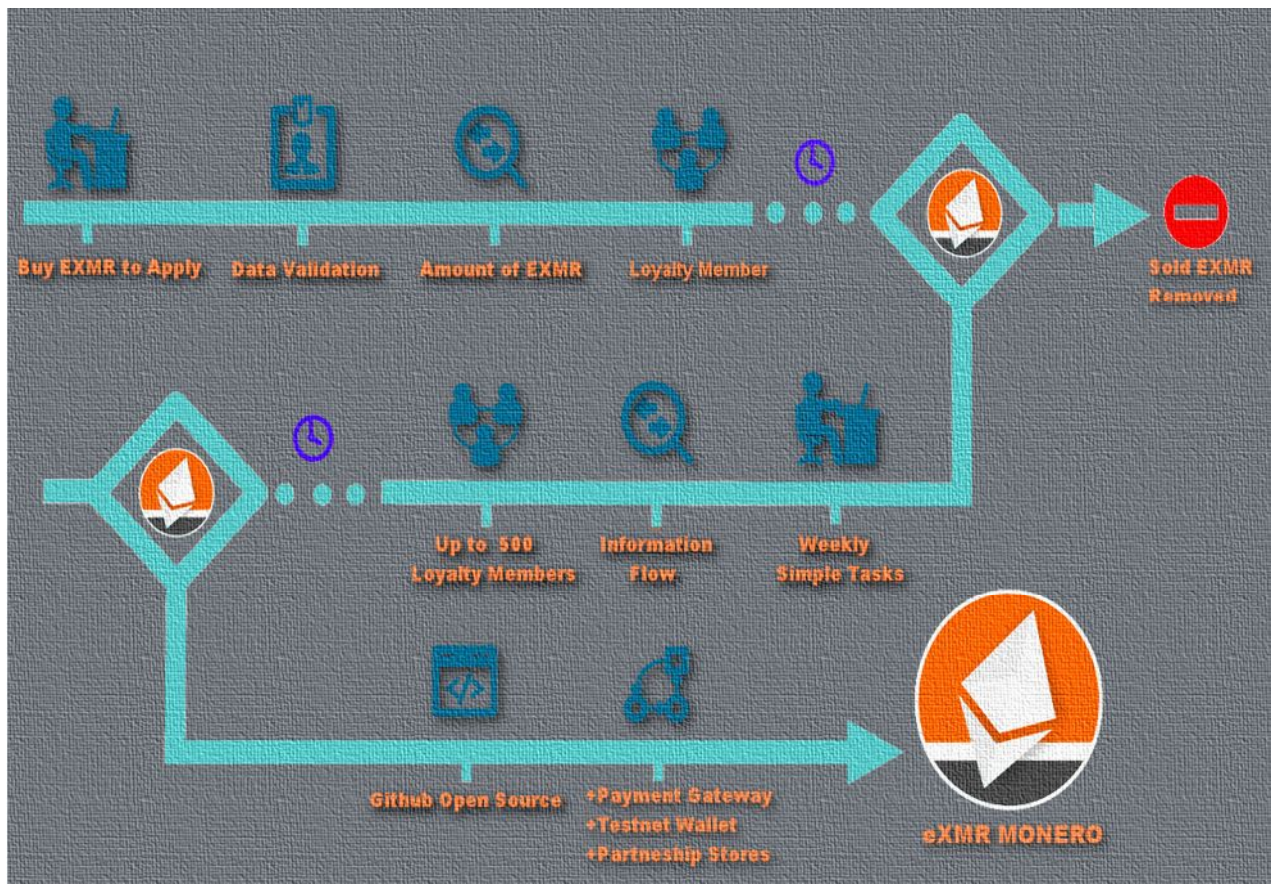

Comparison chart:

6. LOYALTY & WHALES PROGRAM

We present the best loyalty & Whales program, organized and controlled, that make our EXMR each day one of the most famous and coveted projects, among all the crypto coins on the market, we dare to say that soon will take an enviable position before many others altcoins, our strategy of reward dosed into an exclusive group of people creates an expansion of our community, where each participant performed work for ETHEREUM MONERO (EXMR), this would achieve the goals to set for the interests of the project.

Graphic of Loyalty Members in action.

7. VALUE FOR HOLDERS

The value of EXMR is linked to three determining factors.

First - EXMR with a limited edition of 15 million, estimated to reach in a short time a \$ trillion market capitalization, by the great demand and utility of ETHEREUM MONERO (EXMR), creating this increase in the value of EXMR, from, by the use of its payment gateway online, direct sales and multi-wallets point.

Second -EXMR controlled distribution, to achieve increased day by day its value on the market, many people can acquire during his PRE-ICO and ICO and later through markets called Exchange.

Third - EXMR will have a dividend, distributed on a quarterly basis, this bonus will be intended only for accumulators EXMR, which will come from revenues by concepts of the rates obtained by each online sale, received by the users of the gateway getcryptopayments.net, with this incentive to the obtainment of ETHEREUM MONERO (EXMR) as a valuable asset for each holder. Understand that the value of EXMR will grow gradually in time, which makes it into a precious asset and with a promising future.

7.1 ACHIEVEMENTS

We have built a community that is very strong in a short time, managing to create a popularity, within their first months obtained most of 5k followers on Twitter, 2K on Facebook, more than 20K members are connected now to EXMR in all Telegrams groups and more than 73 followers in Medium. You can find us on Reddit and Bitcointalk with over 100 reviews more positive feedback, for both profiles. Another important achievement has been the acceptance of EXMR as the official Monero within the platform Ethereum and myetherwallet firing others who tried to imitate us.

ROADMAP

9.1 GETCRYPTOPAYMENTS

Meet our project:

ETHEREUM MONERO (EXMR), is the official token of GetCryptoPayments®, this payment gateway will be presented in the month of June in its alpha version, and its main function, will be to integrate a wide universe of Tokens and Coins, so that now both merchants online as local, can receive payments in most crypto coins safely, quickly and with a low fee.

How will it work?

ETHEREUM MONERO (EXMR) will be the official token that means the system of voting and payments to list each Token or Coin will be through EXMR, besides that the payments received online or in local stores with EXMR will have 0 fees, only the cost of gas.

What benefit will the merchants have in receiving their payments with EXMR?

They will be able to swap **EXMR to ETH**, only with the cost of gas, without an additional fee, with it you can convert it to dollars easily through our platform.

Whales Program?

Currently we have a program called Whales Members, which consists of holders of more than 50K EXMR, they will have the benefit and advantage, that they will receive a monthly income as long as they keep their EXMR in their wallets, since the platform enters into operation, what we call a dividend this percentage will be distributed to these Wallets in Ethereum Coin.

Where do these revenues come from?

For the following fee concepts: by the transaction, by listing, by votes, by swap, by receiving online and local payments, by placing and promoting your store in the first positions within the platform, etc...

GetCryptoPayments is a well-conceived, comprehensive ecosystem, you can find the project in progress here: **Github**, the only one in this type that will share and distribute its profits to EXMR holders.

10. CONCLUSION

EXMR only 15 million and supported under the Ethereum platform provides in the world of encryption, with the new blockchain technology that we are integrating the ERC-20 and its new ETHEREUM MONERO (EXMR) is now faster.

Our main proposal is to cover several fundamental aspects: security, privacy, lower-cost transaction, speed, and our prototype of business, the payment gateway online, a point of sales, multi-wallets and a global expansion of our project. A macro uses and unlimited EXMR worldwide cryptographic, reaching different languages and quantities of countries, so that everyone can use our services online. EXMR accumulators will now benefit from quarterly dividends, by keeping a number above 50,000 EXMR, all this, are some of the many advantages of the use of our secure ETHEREUM MONERO (EXMR) that makes us better than the previous Monero platform. Everything is changing, always old technology has been replaced with the new one and each one brings a new opportunity to all. Investors in the world of the cryptocurrency can take this opportunity to get in each ETHEREUM MONERO (EXMR) a low-cost output and expect to launch stage begin to bear fruit.
