## Background

### What is Prediction?

Prediction is a statement about an uncertain event in the future. It is often, but not always, based upon facts, evidence, experience or knowledge. Although guaranteed accurate information about the future in many cases are impossible, prediction can be useful to assist in making plans about possible developments. So far, it has been universally applied to all walks of life, especially in Economic field.

### Development of Prediction Industry

As the form of prediction changes, there are three parts of the prediction industry, including Polls, Market Prediction and Platforms of Blockchain Prediction.

Before the advent of the Market Prediction, Polls was the main way of collecting people's views on future events but there were some drawbacks such as relatively high cost and low precision, etc.

Market Prediction motivated the public and improved the precision of prediction by adopting the core mechanism of "Pricing Predicting Behaviors" and "Rewarding Accurate Predictions" .

### Limitations of Market Prediction

Modern economists Friedrich Hayek and Ludwig von Mises made an argument for the economic theory behind the Market Prediction in 1945. Rovski,

cial finance columnist, working in New Yorker, also called Market Prediction as "the wisdom of the group" in 2004, and proposed three essential requirements for collective intelligence: Information Diversity, Independent Decision, and Decentralized Organization.

The Online Market Prediction has developed for 30 years and still applied in partial academic researches as well as inside the single enterprise. Its main restriction lies in different regulatory policies in different regions, which limits the number of participants in the Market Prediction and makes it difficult to provide the large-scale and diversified sample of the best prediction.

## **Market Prediction Transform——Blockchain**

With the development of Blockchain technology, prediction quiz has always been popular and labeled as "Match Blockchain Perfectly". As the scenario of prediction becomes more diverse, users' attentions on prediction has been raised.

At first, use virtual currency rather than fiat money to participate in prediction.

In the regulatory system of some countries and regions, it can make the free trade more convenient and widely spread more users' opinions, thus improving the precision and diversity of prediction.

Furthermore, Blockchain helps to improve the transparency, authenticity and tamper resistance of the prediction in Contract Transaction. The Blockchain Market Prediction possess higher operational efficiency for the characteristics of Blockchain, such as automatic execution of Smart Contracts and the

convenient payment based on Blockchain.

## Strategy of Prediction

In the first phase, Prediction will focus on the first point mentioned above, and lower the threshold for motivating participants by using USDT to participate in the prediction. Besides, its incentive-driven token, PT, will be issued based on the algorithm of POC (Proof of Contribution).

In the second phase, Prediction will be based entirely on Smart Contract so that the participants can participate in the prediction more flexibly and freely. Blockchain Smart Contract will help to create Contract of Events Prediction and support the services such as Continuous Trading Behaviors between Buyers and Sellers, and the Withdrawals of the Earnings Once the Contract Expired Finally.

# Platform Features

## Professional & Dedicated

Predict the price trends of BTC or ETH in the early age  
Available to predict more customized scenarios in the future

## New Incentive Mode

Creative the Proof of Contribution (POC) Mining Mode  
Creative Token burnt mode to strengthen token-holders' confidence

## All Users Participated in

Only 1USDT for Experiencing One Prediction

# Platform Features

## Cutting-edge Technology

Instant and Efficient Prediction  
Convenient Operation for Users

## Conduct Prediction Anywhere

Android, iOS Download will be Available

## Customer Focus

Professional Standards & Quality Service

## PT(Predict Token)

### What is PT?

PT is the Predict Token that issued by Predict platform based on the Proof of Contribution (POC) algorithm and under ERC20 standard. The total volume of PT is **1,000,000,000**, which will not be more issued.

### Rights and Interests of PT

The First Stage: Users gain PT by participating in the prediction based on the PoC algorithm. PT holders can put PT into different prize pools. And after winning the prize, those PT will be burnt.

The Second Stage: PT will support the creation of Customized Events Prediction Scenario based on the Blockchain, and users can create prediction scenarios by paying a certain amount of PT. The odds and options for this type of prediction scenario are customized by the creator. The creator can get profits from the scenario and draw more community users' attention to participate in the activities they hold.

# PT Initial Distribution

## Total Volume

The total volume of PT is up to 1,000,000,000, with 50% generated by Community Mining, 10% for Private Sale, 20% for PT Foundation, 10% for Team and 10% for Strategic Investors.

## Strategic Investors

10% of total volume of PT will be distributed to strategic investors as rewards for their great contributions to the future plan of Predict.

All will be blocked and unblocked in batches. 30% of it will be unblocked when the product is launched officially, and then 10% of it will be unlocked monthly.

## Private Sale

10% of total volume of PT will be distributed to Private Sale, which is an opportunity that Predict offers for the investors who realize their values for the long-term development of the platform.

## Team

10% of total volume of PT will be distributed to Team for its recruitment, R&D expenses, operating expenditures, etc.

All will be blocked and unblocked in batches. At least 10% of it will be unblocked monthly depending on the situation, when the product is launched officially.

## PT Foundation

20% of total volume of PT will be distributed to PT Foundation for its development, operation and promotion.

All will be blocked and unblocked in batches. At least 10% of it will be unblocked monthly depending on the situation, when the product is launched officially.

## Community Mining

Users who make contributions to Predict by participating in the prediction can gain the corresponding proportion of PT by mining.

## **Team & Foundation Share Unblocked Instructions**

On the day of unblocked PT in each month, the Team and Foundation will decide whether to unblock based on the actual operation. To enhance the confidence of PT holders, the PT will not be unblocked when the budgets for operation is adequate. The PT unblocked can be accumulated to the next period whether to be unlocked or not, which will depend on Team's intention and its actual operation.

## **Team Assets Transparency**

The Team and Foundation share address will be announced to the users in the community group whenever the share changes.

Meanwhile, the product development progress and team revenues and expenditures will be announced in the monthly report, including team operation, product development, promotion expenses, and changing data of PT held by the team, etc.

## PT Issued & Burn

There are eight steps of the whole prediction and PT issued & Burn. Prediction will support more predictions for a variety of scenarios.

Start prediction

End of Prediction

PT Mining

Contribute Bonuses to the Prize Pool

PT Betting

Distribute Bonuses

PT Burn

## Start prediction

Participants bet on the principal to participate in the prediction based on various indicators of BTC prices and their own experience and knowledge. Confirm three elements as below to predict:

- 1.The Principal Amount. With a minimum amount of 1USDT each time, use the extremely convenient digital currency as the unit of the bet.
2. Price. That is, the Strike Price. After a round of prediction, compare the Strike Price with the Expired Price.
3. Changing Price. High or Low.

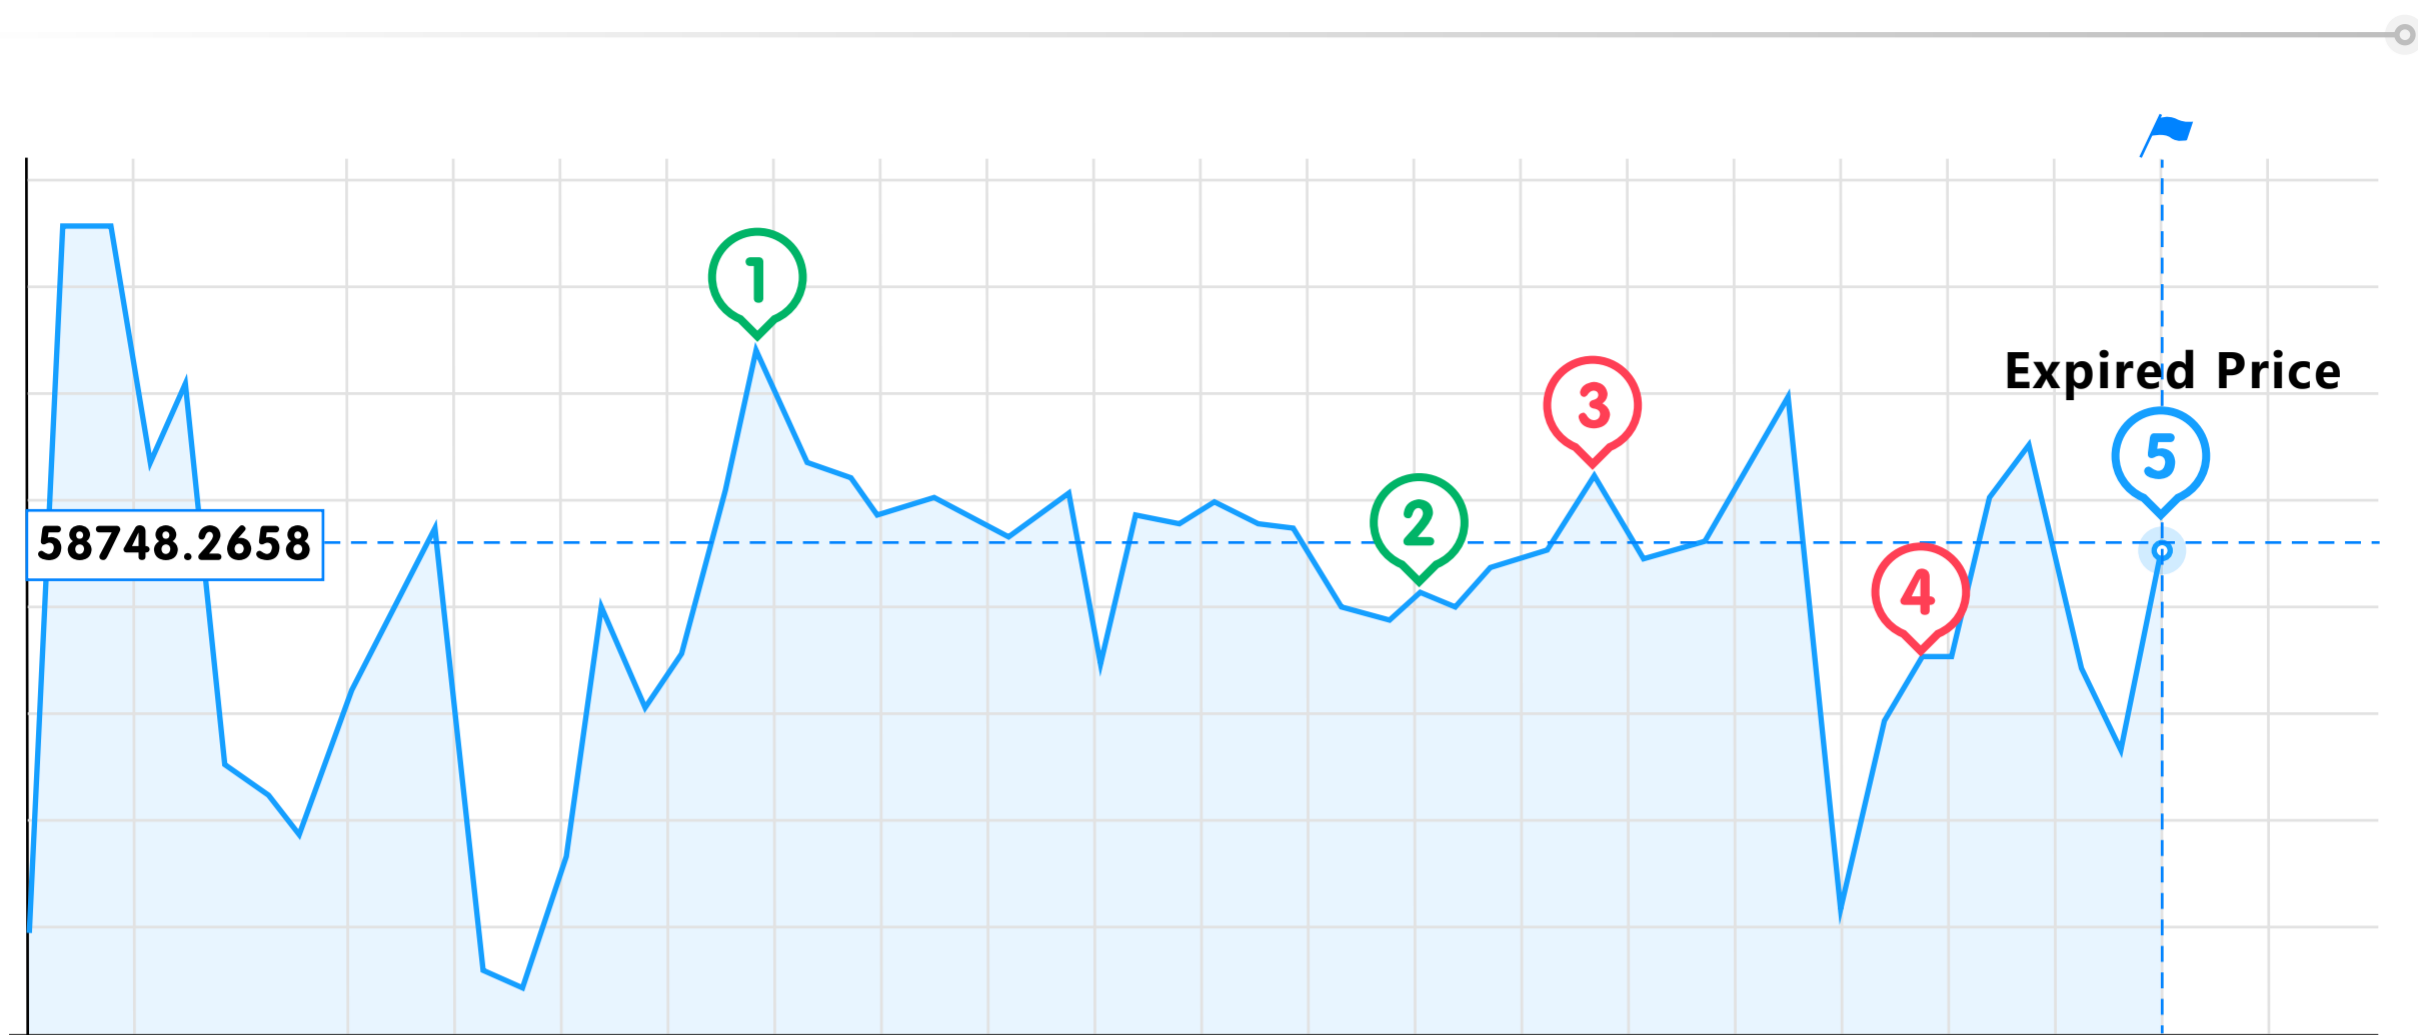

## End of Prediction

### Results of Evaluation

The results will be counted at the end of each round.

Correct Prediction : Expired Price  $>$  Strike Price, and the order with rising price; Expired Price  $<$  Strike Price, and the order with dropping price

Incorrect Prediction : Expired Price  $<$  Strike Price, and the order with rising price; Expired Price  $>$  Strike Price, and the order with dropping price

① Strike Price > Expired Price  
Rising Price (Incorrect Prediction)

② Strike Price < Expired Price  
Rising Price (Correct Prediction)

③ Strike Price > Expired Price  
Dropping Price (Correct Prediction)

④ Strike Price < Expired Price  
Dropping Price (Incorrect Prediction)

## Bonus Distribution

Correct Prediction Odds CR=70%;

Incorrect Prediction Return Ratio RR=15%;

Revenues of Each Party (when the prediction is over):

Revenues of Correct Prediction Party = Betting Principal \* (1 + CR);

Revenues of Incorrect Prediction Party = Betting Principal \* RR;

Revenues of the Prize Pool = 15% of the total principal of the Incorrect Prediction Party will be contributed to the prize pool.

## PT Issued

At the end of a round, the Incorrect Prediction Party can get partial return of principal (betting principal \*RR) and can gain the corresponding proportion of PT by mining according to the POC (Proof of Contribution) algorithm.

## About the prize pool

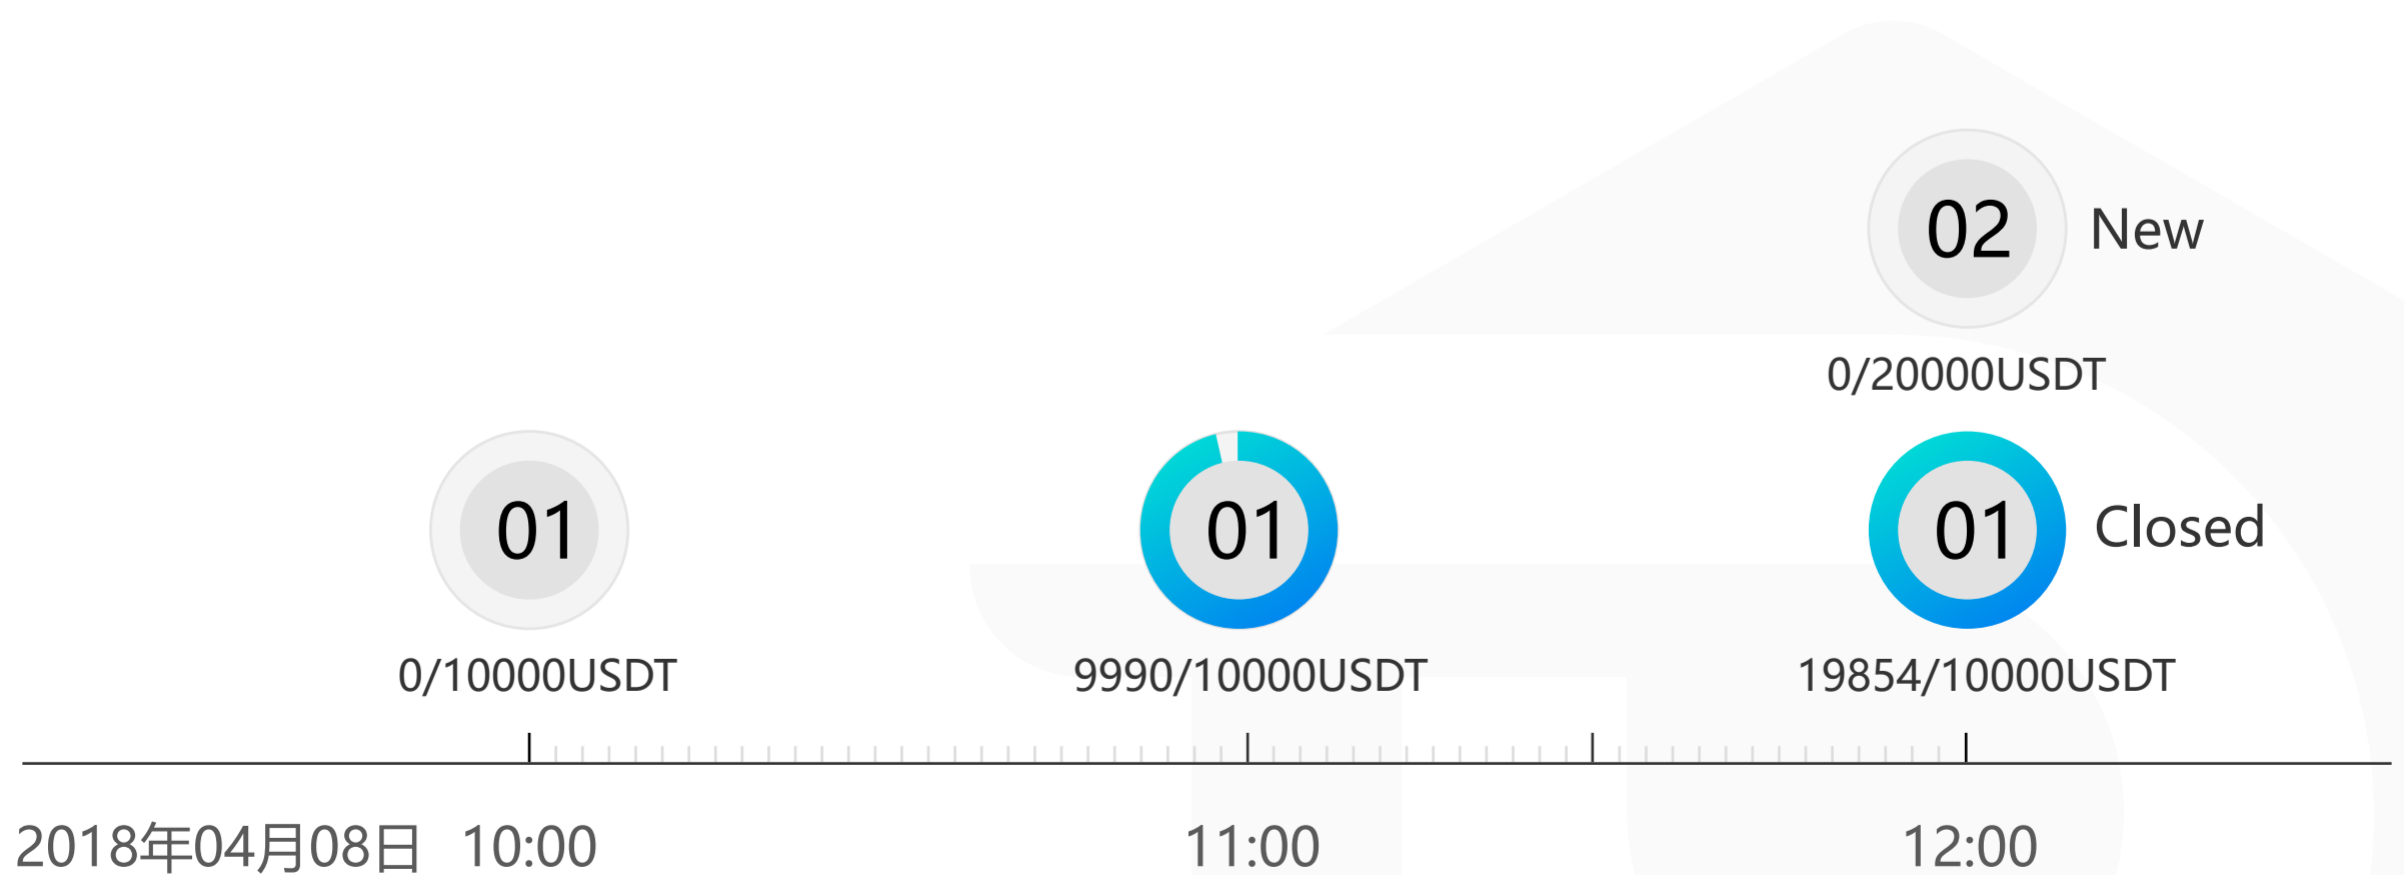

### Prize Pool Design

Initially, the Minimum Amount for the prize pool is 10,000USDT.

The Total Prizes putting in the pool is required to be more than or equal to the Minimum Amount, and the new prize pool will not open until the next hour (at integral point).

Minimum Amount of new pools = Minimum Amount of Previous Pool +10,000USDT.

As shown in the following figure:

## For example:

The initial prize pool number was 00001, the start-up time was 10:00:00 on April 8th, 2018, and the minimum amount was 10,000 USDT;

The amount of prize accumulated in the prize pool was up to 9,990USDT at 11:00:00, April 8th, 2018, which did not meet the requirements of the minimum amount of the prize pool. Therefore, the prizes in the next duration was still contributed to the prize pool No. 00001, and no new prize pool open;

The amount of prize accumulated in the prize pool was up to 15,000USDT at 12:00:00, April 8th, 2018, which met the requirements of the minimum amount of the prize pool.

Therefore, the final accumulated prizes of the No.00001 prize pool was 15,000 USDT, and the new prize pool No.00002 open. And the minimum amount of No.00002 was 20,000 USDT.

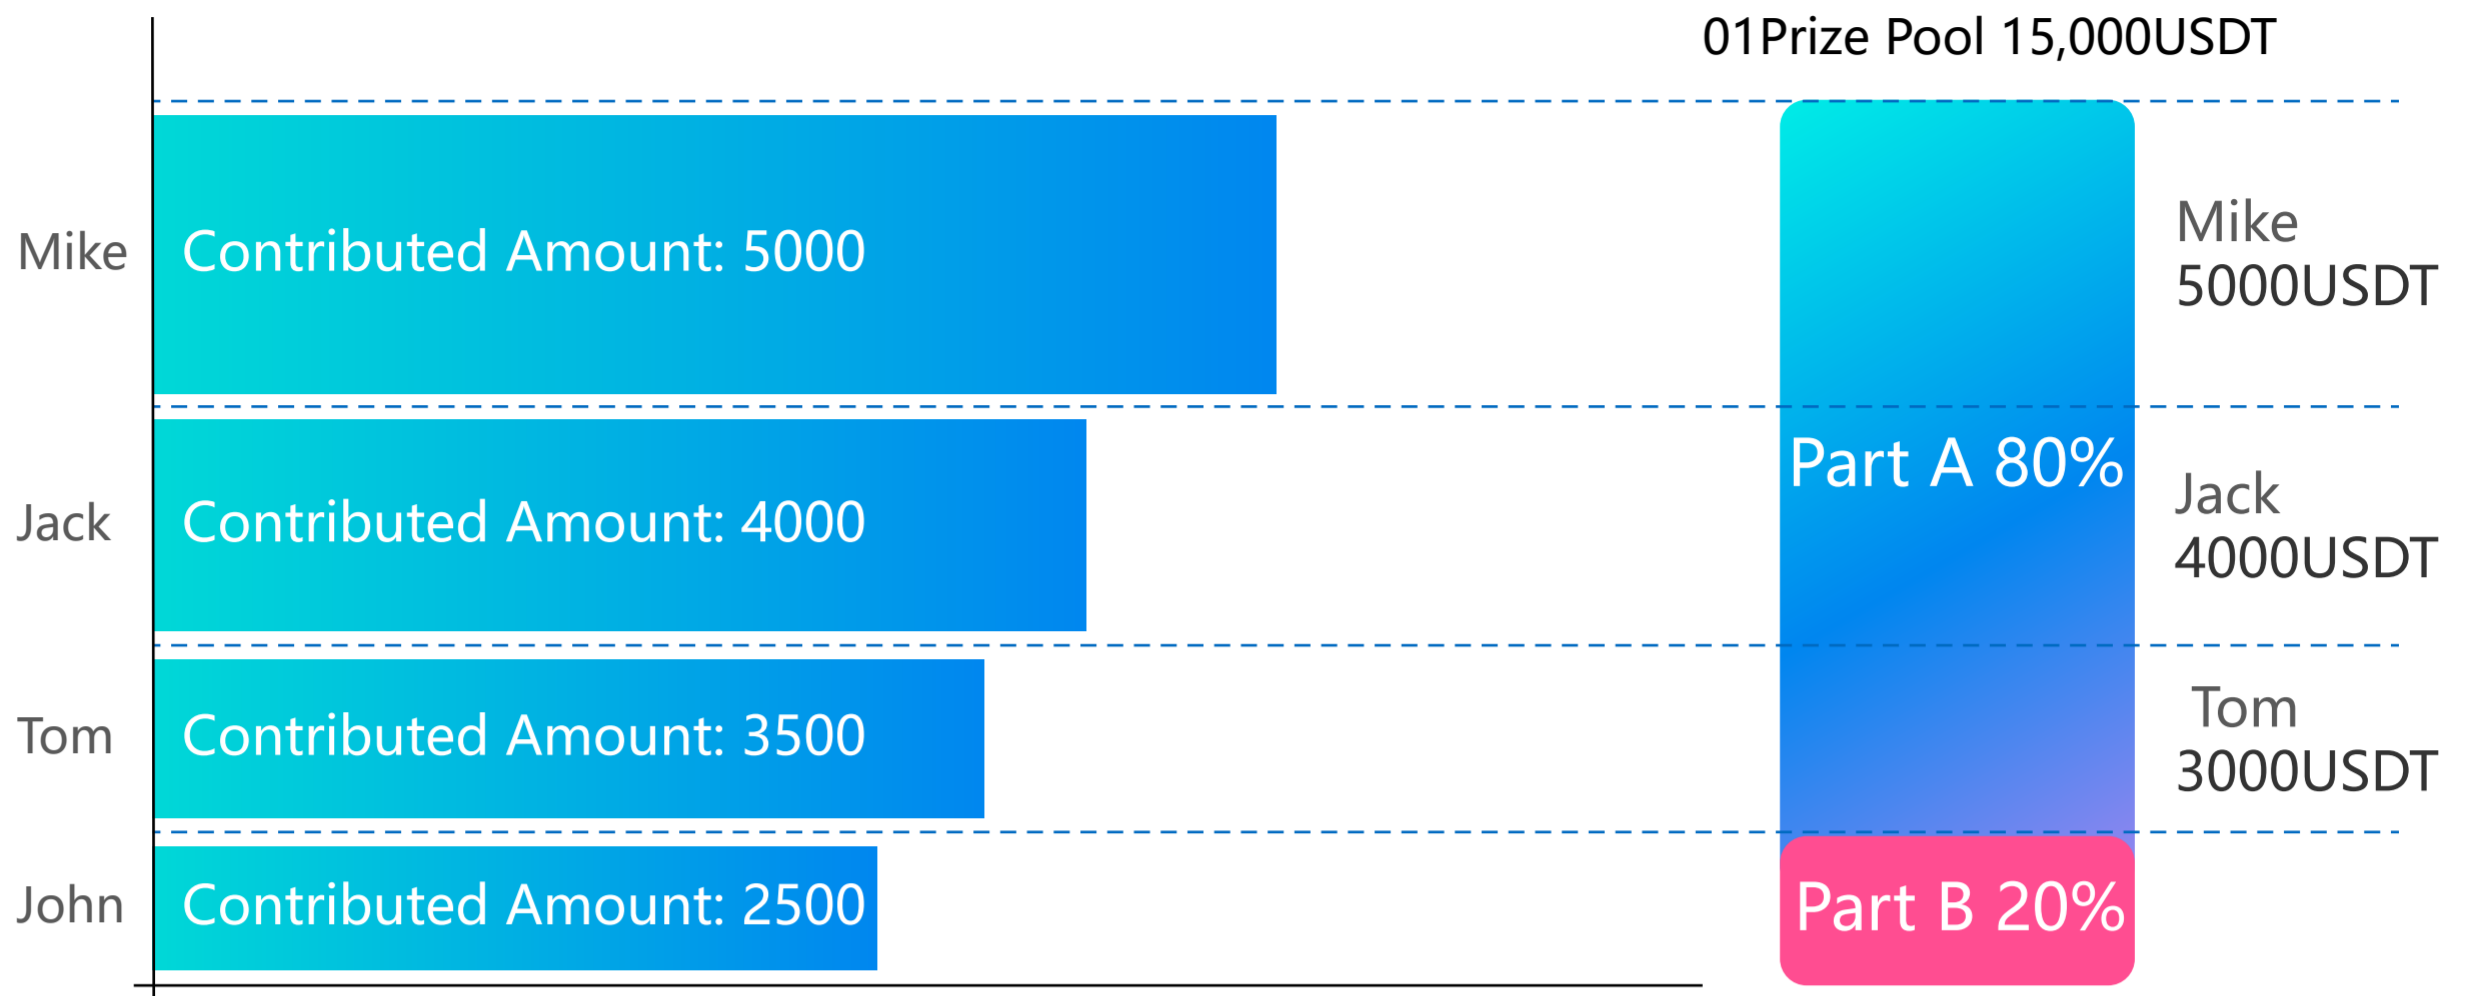

## Prize Distribution

When the prize pool is decided, the next step is to distribute the prize.

There are two parts, PartA and PartB:

PartA accounts for 80% of the total prize in the pool and the prize will be distributed to contributors to the prize pool. The specific rules are as follows:

PartB is PT Burn Incentive, accounting for 20% of the total prizes in the pool,

# Roadmap

-  **January, 2018**  
Conducted Feasible Researches
-  **February, 2018**  
Built the Team
-  **March, 2018**  
Established Overseas Foundation
-  **April, 2018**  
Launched Projects
-  **August, 2018**  
Publish the White paper, Website
-  **August, 2018**  
Private Placement
-  **October, 2018**  
APP available
-  **Fourth Quarter, 2018**  
App officially launched & Prediction of BTC Price Trends Available
-  **Fourth Quarter, 2018**  
Start POC Mining Mode & Launch Token Burnt Plan
-  **First Quarter, 2019**  
Available to predict more scenarios
