# THUNDER STONE

BUSINESS WHITE PAPER

BACKGROUND AND CONCEPT

- With regard to games, whether Pokemon Go, Clash of Clans, League of Legends, the blockchain game Crypto Kitties that caused ETH congestion, or Crypto Countries with a one-week transaction ETH amount of more than 10,000, there is always a game leaving you a deep memory.

- There originally exists enough scenes and real demands required by the blockchain, such as the user communly, virtual commodity transactions, token settlement and economic incentive mechanisms.

- At present, blockchain games have sprung up everywhere, and CryptoPet has fired the first shot of blockchain games. Under the temptation of the massive volume of the industry, ThunderStone, as the online entertainment industry with the most extensive coverage of the crowd and the game industry where blockchains are most likely to settle first, will focus on the R&D and release of the top blockchain games all over the world in the future. We hope to reform the entire blockchain game industry by continuously trying innovating and become an international advanced blockchain game company in the future.

BLOCKCHAIN GAME PAIN POINT

CRYPTO KITTIES

- Take the example of the representative works Crypto Kitties, from the perspective of gameplay, it only has reproduction playing method, and its interaction is simple.

- In fact, the essence of Crypto Kitties is to generate a new cat to have a lucky draw through a random gene combination arrangement. If a prize such as a rare gene combination is drawn, the next "fancy cat" claimed has added value.

BLOCKCHAIN GAME PAIN POINT

The status of blockchain games at the present stage: simple draw games, no gameplay innovations, increasing currency mobility. Based on the unique cryptographic features of the blockchain, increasing the ability of game assets to hold value, increasing the fairness of the draw, the underlying financial attribute and pure speculative gameplay features. These are all part of the present blockchain game industry, which has only short-term speculative attributes, does not have any game attribute, with a short life cycle.

REALITY

- 99%of all the blockchain games with smart contract

- poor gaming performance, unable to support medium or large-scale level games.

- bottom level spreading and Pyramid scheme mode, easily collapse within a week

-

Solving the problem: what ThunderStone plans to do

↓

THUNDERSTONE   ENGINE

Put gigantic operations on the side chains. At the same time we solve internet congestion, we will also be able to expand and enrich all of our games. Flexible operating rules also provide us possibilities to run large-scale games.

Self-developed mini gaming engines in order to solve blockchain related services.Side chains+on chain trading center+mature token transferring plan.

Perfectly solved gaming performance issues with high-efficiency and safety

FUTURE BUSINESS LANDSCAPE OF THUNDERSTONE

ThunderStone focuses on providing contents of blockchain games, integrates R&D, operations and ecological construction into one, and carries out Token economic construction within the ecology (including but not limited to self-developed games) and the Industry investment layout of the foundation.
