PRINTEX TEAM

Meet the engine of Printex

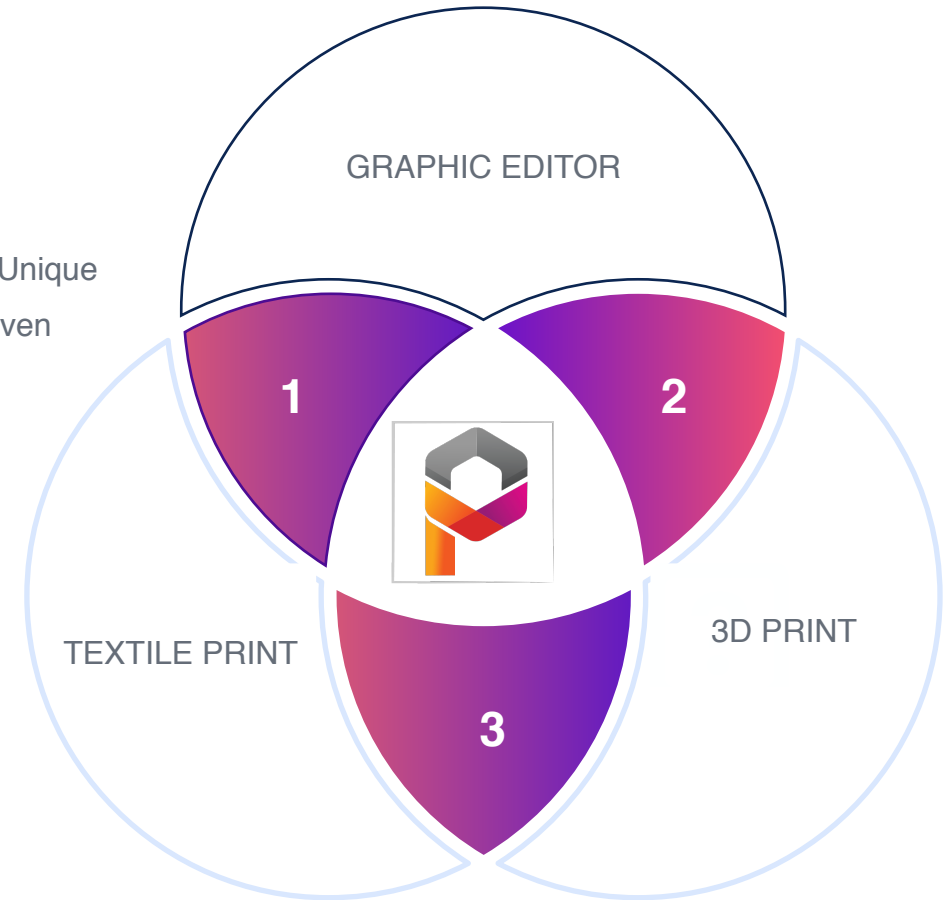

« **Eco-System** specialized in **Printing.** » **Textile - 3D Print**

For each one of these sectors, the demand is very high and is a new investment opportunity.

Reproducing digital images or text on fabric (textile) is very useful for personal and commercial use. Unique items are produced, and can be displayed as banners or flags to promote businesses or events, or even applied on clothes.

Printex provides a special platform for each one of these sectors and secures transactions efficiently with blockchain technology between those different platforms. You do not need to use specific and expensive programs like Photoshop (or other editing programs) to have what you want on your items.

With Printex you will have the simplicity to choose the service you want, while being guaranteed a high quality result, simple and fast.

PRINTEX TEXTILE

Value Proposition - Textile Printing :

Today's, **trend** is to wear T-Shirt or Sweat, worn with a ***specific text or image*** for it to be **unique**.

With textile printing, you can simply have everything you want on your clothes (texts, images, quotations) and with the desired size.

This technology ensures that the printing does not fade or peel, even if it's on a cup, plate or a sweat.

The results are almost permanent, and that's what makes this technology unique.

Printex allows user with a platform to create all textile clothes or objets you want, and we deliver internationally your order at your home.

Almost **every business** in the world uses banner ads or graphic designs to **attract the visitor's attention.**

Nowadays If you want to create quality web advertising, banners or picture for your social networks (facebook, instagram etc) to acquire new customers and increase your income, banners are one of the most prolific marketing tools on the web.

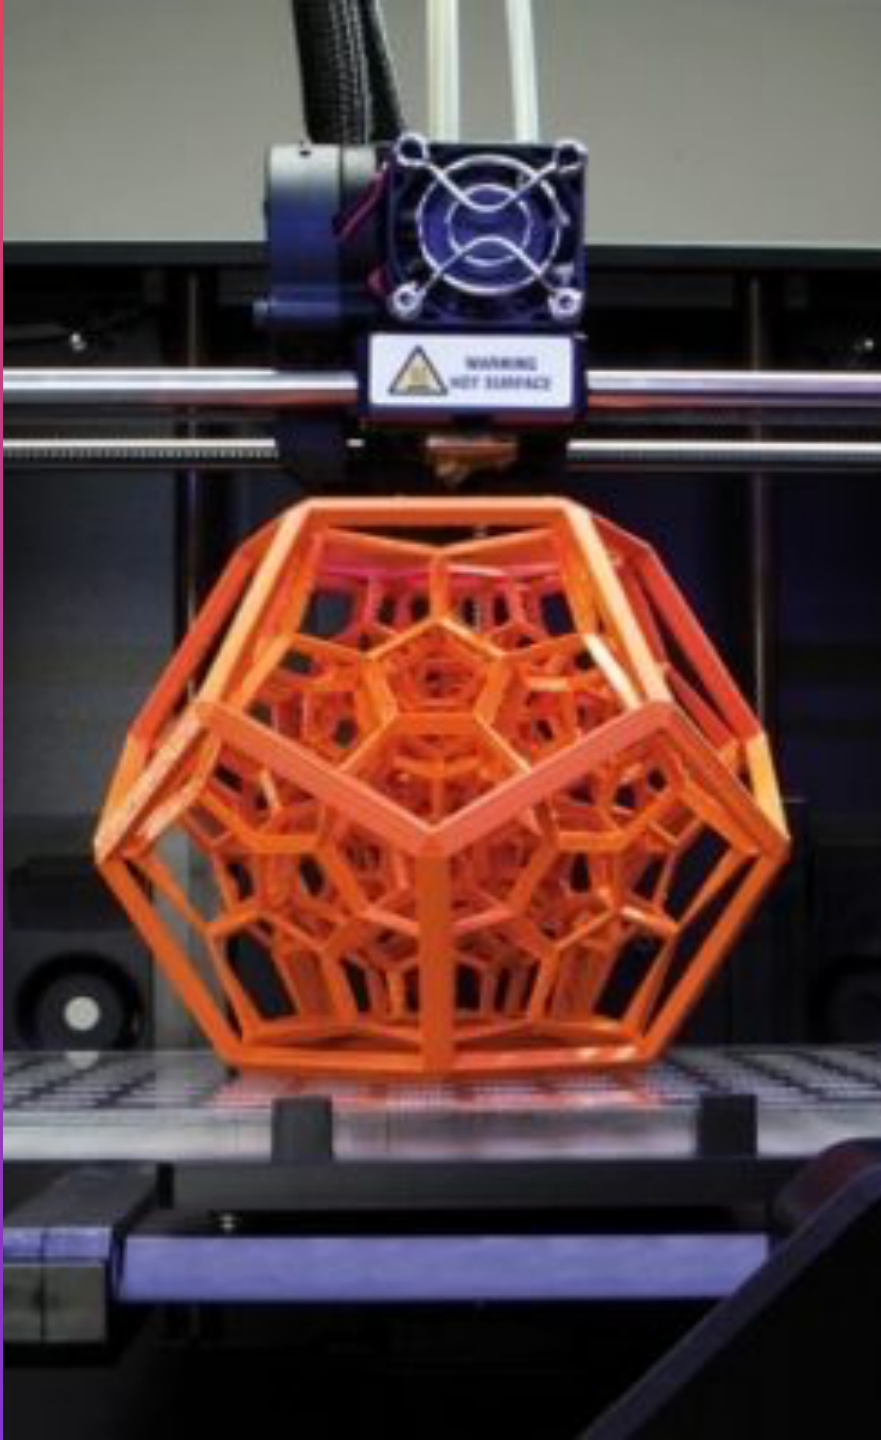

But creating your own graphics and banners is not easy for everyone.

Printex offers you a platform to create any kind of graphic design for your company or your personal needs.

GRAPHIC EDITOR

PRINTEX - 3D PRINT

Value Proposition - 3D Printing :

Today, what makes **3D Print** technology revolutionary is **the absence of industrial constraints** to manufacture an object.

3D printer can reproduce any model from a computer file. This can be helpful for business in project development. They will be able to manufacture prototype and scale models in way to cost effectiveness.

Every person too can now create or receive an 3D model.

For example, you can print the bust of your child in 3D and send it to your grandparents from miles away. But for now, this technology is far from affordable.

Printex allows you to design and print the 3D creations you have imagined.
